Artificial Intelligence Review (1991) **5**, 320

Author Index

Main articles

Alterman, R. Understanding and summarization, 239
Clarke, M. R. B. Conditionals, uncertain rules and belief revision, 71
Covington, M. A. Efficient Prolog: a practical tutorial, 273
Dodd, T. Viewpoint: Godel, Penrose and the possibility of AI, 187
Galton, A. Editorial: Logic and AI, 1
Measor, N. Logics of knowledge and belief-applications, 35
Miles, J. C. see Moore, C. J.
Moore, C. J. Knowledge elicitation using more than one expert to cover the same domain, 255
O'Hare, G. M. P. see Reddy, M.
Obeid, N. & Turner, R. Logical foundations of nonmonotonic reasoning, 53
Reddy, M. & O'Hare, G. M. P. The blackboard model: a survey of its application, 169
Sharkey, N. E. Connectionist representation techniques, 143
Sheridan, F. A survey of techniques for inference under uncertainty, 89
Spencer-Smith, R. Modal Logic, 5
Turner, R. see Obeid, N.
Whitby, B. Viewpoint: Ethical AI, 201

Book Reviews

Bolc, L. Artificial Intelligence and Information — Control Systems of Robots, 89
Bolc, L. Connectionism in Perspective, 233
